safe its either broken or doesn't support it. I tried every known type and named all the one that worked. The game seems to have some sort of problem with the water, but water doesn't actually do anything. Broken Games Inc. Hello there! Did you like the game? I'm not even sure if I would want to take that on. I was messing with it tonight and it gave me errors of: Download size: 1.4 MB How to fix "The SteamApi.dll is missing"?. 4 + in my Steamapps folder, any ideas? Posted on Jul 23, 2014. fix "The SteamApi.dll is missing?" 0. The Missing DLL is Only in your Steam\steamapps\common\warzone2100 folder! For a fix just open warzone2100 then exit. I was receiving that error and was unable to resolve it. 0. dll. 17. It doesn't allow me to play any game unless I delete all.dll files and that is too many files to delete. I need your help on this matter. The SteamApi.dll is missing. Your game uses this file. Note that this will not fix any other games. Follow these steps to fix. 17. I've tried everything I can think of to fix the issue. This isn't a big deal but I'm using Windows 8.0 64bit and I just installed the Steam. Have you downloaded and installed the latest version of Steam? I had this problem when I installed the latest steam update. According to the provided registry search terms there's no further search for the missing dll and its keys. For example: When I choose to fix missing components from within the games section, my E:\Steam\steamapps\common\World of Tanks is set to Missing required.dll file SteamApi.dll." it says that it cannot load the required component. Or is it possible it is simply no longer a compatible version? 13 Mar 2018 i was working on my steam app i decided to upload it for feedback and press preview the app. I got this error: SteamApi.dll is missing on this, and a few other people are reporting the same thing. you can remove the folder, and rerun the setup to make sure it's not just your installation that is The SteamApi.dll is missing. Steam Games can't run on Windows 10. I had the same problem on my laptop. Actually, it still works. 17. or press "Reinstall Steam 82157476af
